CAREER OBJECTIVE

Fourth-year Software Engineering student focused on full-stack web development and user-oriented solutions. Experienced in building REST APIs, relational database systems and responsive user interfaces through internships and collaborative software projects. Interested in developing maintainable, secure and scalable applications.

EDUCATION

Doğuş University - Software Engineering (4th Year)

2022 - Present | GPA: 2.85 / 4.00

CERTIFICATES & COURSES

GOIT Fullstack Developer Course - Completed (08.08.2025)

Frontend: HTML, CSS, JavaScript, React, Redux Toolkit | Backend: Node.js, Express.js, REST API | Extras: TypeScript, Git, Docker, Swagger/OpenAPI

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript | **Frameworks:** Spring Boot, Next.js, React, .NET Core

Databases: PostgreSQL, MySQL, SQLite, MS SQL | **Tools:** Git, Docker, Maven, VS Code, Visual Studio, SSMS

PROJECTS

PDA - Project Delivery Assistant | Co-Developer

Sep 2026 - Present | Open-source team project

- Co-developing a self-hostable project and task management platform for students and small teams.
- Tech stack and architecture: Java, Spring Boot, Spring Modulith, Next.js, TypeScript, Tailwind CSS, PostgreSQL and Docker; modular monolith and REST APIs.

PTS - Personnel Tracking System | Full-Stack Developer

2026 | X-ETC.

- Developed HR modules for personnel records, leave, overtime, expenses, advances, assets and recruitment.
- Implemented .NET Core / EF Core APIs with MS SQL and integrated React user interfaces; contributed to Docker setup and troubleshooting.

ISS - Inventory & Stock System | Software Developer

2026 | X-ETC.

- Worked on inventory operations, supplier management, cash transactions and reporting features.
- Built .NET Core / EF Core backend functionality with MS SQL, including APIs, business rules and export/reporting workflows; supported production Docker configuration.

INTERNSHIP & WORK EXPERIENCE

Software Intern - İdeal Çözüm Software Technologies Ltd. - Istanbul

Aug 05, 2025 - Sep 01, 2025

- Developed an Inventory/Stock Tracking System with product, category and brand management, search and filtering.
- Implemented REST APIs and data persistence using .NET Core and MS SQL; created React and MUI interfaces and integrated backend services.
- Used GitHub for version control and prepared project documentation.

Software Intern - X-ETC. - Istanbul

Jul 06, 2026 - Aug 03, 2026

- Contributed to a Personnel Management System covering personnel, leave, overtime, expenses, advances, assets, recruitment and access controls.
- Developed backend services, APIs and business rules with .NET Core, Entity Framework and MS SQL; developed React interfaces.
- Worked on Docker configuration, GitHub collaboration and troubleshooting.

Systems Administration Intern - Aktek Bilgi İletişim Teknoloji A.Ş. (Akkök Holding) - Istanbul

Aug 10, 2026 - Sep 04, 2026

- Supported corporate device preparation, domain onboarding, user account administration and security configuration.
- Built a desktop software installation utility (YazılımKurulumAraci) to install standard company applications in a single run.
- Assisted with systems operations and troubleshooting for end users.
